

At Home SCIENCE

Date: _____

Experiment: _____

Materials:

- 2 Cups Flour
- 2 Cups Warm Water
- 1 Cup Salt
- 2 Tablespoons Vegetable Oil
- 1 Tablespoon Cream of Tartar
- Optional: Food Coloring

Procedure (Follow Directions):

- Mix all the ingredients/materials together in a large saucepan or pot over low heat. The dough will start to thicken.
- Once the dough begins to pull away from the sides and clumps together in the center, remove pan from heat and let it cool before handling.
- Tip: If the dough is still sticky, keep cooking and stirring it.
- Move the dough to a clean surface (table counter or chopping board work great) and knead until it feels soft and smooth.
- Divide the dough into balls.
- Press a small dent into one of the balls. Add one or two drops of food coloring. Fold it over and begin kneading once more, evenly distributing the color. Add food coloring as needed.
- Play! Build! Enjoy!
- Store in an airtight container (Tupperware or plastic baggies work great!).
- If it dries out, just add a little bit of water and knead it back to perfection.
